② Take a test

Wash your hands with soap and warm water, rinse and dry before sampling. Remove the lancing device cap then insert a sterile lancet. Twist the protective cover. Place the cap back onto the device.

Insert a test strip (gold side and 2 silver prongs facing you) to turn the meter on.

Silver prongs

Test strip port

Adjust the depth setting on the lancing device. Cock the lancing device and hold firmly against the side of your finger. Press the release button. Gently squeeze finger to get a round drop of blood.

Approximate size

Apply blood sample to the channel on either side of the test strip.

Once the channel fills, it will turn red and your result will appear in about 5 seconds.
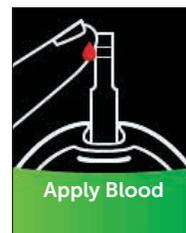

Apply Blood

3 View your reading

ColourSure® Dynamic Range Indicator

The ColourSure® Dynamic Range Indicator instantly lets you know if your reading is below (blue), within (green) or above (red) your range limits. It also shows when your reading is near the low or high end of your target range. A text note or emoji points to a segment on the Colour Bar.

Examples of Readings
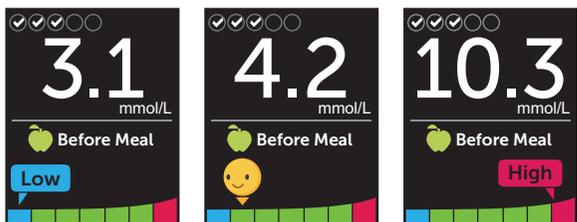

3.1 mmol/L — Before Meal — Low	**4.2** mmol/L — Before Meal	**10.3** mmol/L — Before Meal — High
Below Range	Low End of Range	Above Range

Meal and event tagging

A Before Meal (🍎) tag will automatically be applied to your result. You may change your meal tag to After Meal (🍏) and add an Event tag.
